

DACHI GIORGOBIANI

Web Developer

PROFILE

I am a dedicated web developer with a focus on frontend, but just as important to me is the way I collaborate.

I listen carefully to what is asked and ensure that everything is executed exactly as intended.

At the same time, I'm not afraid to take initiative and take the lead when necessary. Thanks to my extensive experience working both independently and in teams, I know how to work efficiently and with purpose.

I value collaboration and believe that the best results come from sharing and refining ideas together.

RELEVANT WORK EXPERIENCE

Intern full stack developer - Twintag Herentals 2200

february 2025 - present

I contributed to developing the internal admin portal and client projects with AI implementations, handling both frontend (React, Angular) and backend (Golang, GraphQL) tasks, focusing on usability and efficiency. Daily stand-ups and regular scrums were part of the workflow.

Intern eCommerce frontend developer - Meteor Digital NV Kontich 2550

february 2024 - june 2024

I did research on PWAs using Shopify Hydrogen (Headless React) to improve internal workflow. Daily stand-ups and scrums. I was involved in client projects, mainly in frontend with occasional backend tasks and client communication.

Group project: frontend developer - iCapps Antwerp 2000

october 2023 - january 2023

We developed a platform for interns and mentors using Next.js and Tailwind. Primarily in frontend, with support for backend issues using MongoDB.

RELEVANT SKILLS

Frontend	Backend	Mixed
TypeScript JavaScript	GraphQL MongoDB	Git
React Angular Remix	Golang	Agile
Tailwind Sass		Integrating AI
Three.JS R3F		

EDUCATION

Artesis Plantijn Hogeschool, Antwerp 2000

February 2022 - present

Graduate Programming
